

# Time Control Equipment

MODEL: TCCKANEN – ANALOG CLOCK ENHANCER MODULE

TCCKANEN

## FEATURES

- Allows the use of Rauland analog clocks with intercom/paging speaker wires providing power and correction signals
- Enables software enhancements in new Rauland analog clocks
- Five year warranty
- Great for simplifying installations thus decreasing labor costs
- Facilitates reduced wiring schemes for Rauland analog clocks
- Enables unique, patented analog clock functions

## DESCRIPTION

The TCCKANEN allows new Rauland analog clocks to be powered and corrected using the intercom/paging speaker wires. This type of reduced wiring application can greatly reduce the labor required to install a time keeping system. The TCCKANEN is part of a Rauland clock system that provides a very reliable, maintenance-free system that continues to save customers' money over the life of the facility.

## SPECIFICATIONS

Environmental Parameters:

Temperature: 40° F (4° C) to 90° F (32° C)

Relative Humidity: 0 to 85% (non-condensing)

Power Requirements: 3.6 V @ 35 uA power drawn from analog clock

Wiring Requirements: Powered by an analog clock – requires no additional wiring. Plugs into a 2x7 pin header on the rear of the clock.

Dimensions: L: 1.4" (3.6 cm)

D: 0.5" (1.3 cm)

H: 0.2" (0.5 cm)

Weight: 0.1 lb. (45 g)

As an inexpensive enhancement to Rauland analog clocks, the TCCKANEN provides a competitive advantage over wireless clocks (no RF penetration concerns, no battery maintenance) and maintains the high reliability expected by Rauland products that are backed by a 5 year warranty. The TCCKANEN is packaged in blocks of four.

## ASSOCIATED EQUIPMENT

TCCKAN12 – 12" Analog Clock

TCCKAN16 – 16" Analog Clock

RCKAN12 – 24-hour Dial Analog Clock

TCCKCIND – Clock Correction Inductor

TCCKIND25 – 25V Clock Inductor
