

## Rauland-Borg Partners with Motorola Solutions

Responder® 5 Partnership with Motorola's Total Enterprise Access and Mobility (TEAM) Solutions offers Improved Productivity, Responsiveness and Quality of Patient Care

Mount Prospect, IL. March 1, 2011 – Rauland-Borg Corporation, the leader in nurse call systems, announced their partnership with Motorola Solutions, Inc., and the Rauland Responder 5 integration to Motorola's award-winning Total Enterprise Access and Mobility (TEAM) solutions.

"Wireless technology has become a core element in communications for hospitals, it helps deliver timely response to patients' needs and expectations. Responder 5 Nurse Call integration to wireless systems, such as the TEAM solution provides immediate patient-to-staff connections for improved patient care and safety."

– Maureen Pajerski,  
VP of Sales & Marketing  
Rauland-Borg Corporation

Rauland-Borg's Responder 5 Nurse Call enhances patient-to-staff interaction by integrating with the industry's most comprehensive communication solutions such as Motorola's TEAM technology. Phone and nurse call integration provide healthcare institutions with the communication technology they need to help provide advanced care to patients.

The Responder 5 Nurse Call enables hospitals to exchange information through an easy-to-use system that offers true voice-over-IP (VoIP) connectivity and integration to complementary technologies, such as patient information systems, Motorola wireless phones and other devices. By integrating the TEAM solution with Responder 5, caregivers have the ability to receive and respond to patient requests from any location throughout the hospital. This increases workflow productivity by eliminating wasted steps, reduces response times to calls and eliminates overhead paging, which ensures a quiet more comfortable environment for patients.

“Making sure healthcare providers have access to the latest communications technologies is key to ensuring patients receive the best care possible. Extending the Rauland-Borg Responder 5 Nurse Call system to the TEAM VoWLAN smartphones enables nurses to immediately respond to patients, improving patient care and recovery time, and greatly reducing the time spent walking between the nursing station and patient rooms just to communicate.”

- Imran Akbar, Vice President,  
Motorola Solutions

Motorola’s TEAM voice-over-WLAN (VoWLAN) solution provides on-the-go healthcare staff with comprehensive voice and data services to increase productivity, responsiveness and the interaction with patients – all based on standards to leverage existing infrastructure.

With this integration, nurses and technicians can react, real-time, to changing patient needs - eliminating wasted time to walk to a phone or wait for a connection. The Responder 5 can be implemented in multiple departments - an added benefit for nurses and physicians who work in the OR or emergency room and need mobile access to respond to calls, or paramedics en route, enabling them to exchange critical information and allow rapid response teams to react quickly to code blue alerts.

The integration of Responder 5 Nurse Call to Motorola TEAM phone solutions offers hospitals yet another option of telephony to help expand their internal patient-to-staff and staff-to-staff communications.

### **About Motorola Solutions**

Motorola Solutions is a leading provider of business- and mission-critical communication products and services for enterprise and government customers, as well as the originator of Motorola Smart Phones and HD Xoom Tablet.
