Responder® 5 Direct Connect

Choose Your Systems. We'll Connect.

Direct Connect allows you to pick the systems your hospital prefers. We'll connect seamlessly.

It's as easy as connecting point A to point B … without needing anything in between.

Strengthen your unit and staff's efficiency and effectiveness by easily making your people and information work better, together.   Rauland Responder's Direct Connect interface methods quickly and easily improve your connectivity — across all of your integrated hardware and software systems — to share nurse call information without the need for third-party vendors.

Direct Connect

Responder 5 can now connect directly with your other systems — wireless phones, RTLS, EMR — to immediately improve workflow, save time and help increase patient satisfaction.

With Direct Connect, you easily and quickly simplify your processes — both internal and external to Responder 5 — to maintain ease-of-use and improve staff productivity. You also capture the information you need to balance workloads and access better reporting.

Now, you can empower your clinicians with the right tools to improve their daily workflow as well as patient outcomes, and easily direct information and communication to the people that need it.

AMETEK®

Improved Connectivity

Using Direct Connect for Responder 5 nurse call systems, you gain immediate benefits for your unit, for your staff and for your performance.

• Improved connectivity with integrated hardware/software

• Reduced need for third-party vendors for nurse call interface

• Reduced implementation costs

• Simplified processes internal and external to the nurse call system

• Improved clinical workflows with support for direct-care models

Mobile Devices

Responder 5 directly connects with virtually any SIP-capable phone system. Gain immediate real-time communication with patients as well as PC Console messaging to staff with wireless phones and smart devices. Direct communication, faster response times, streamlined workflow and greater efficiencies benefit both patients and staff.

RTLS Devices

With our direct open architecture interface, you can choose from many leading vendors and technologies for locating solutions. Connecting RTLS with Responder 5 provides enhanced communication capabilities for staff, faster response times for patients and a more hands-free approach to patient care.
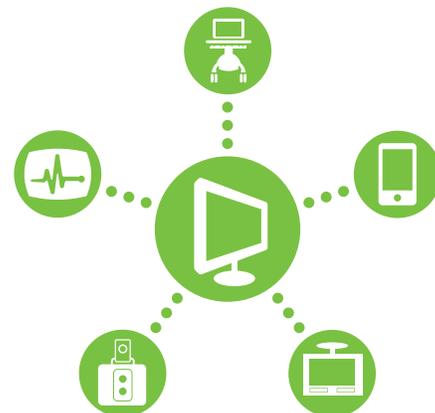

Reports Manager

View, monitor and trend the activities that impact your workflows and the performance of your unit. With a direct interface across many solutions, you can gather and analyze key performance indicators related to your staff and your patient interactions — with real-time reporting.

ResponderSync™

With this direct interface, you can now have full command of vital information and links with up to five different systems, all with one sign on via ResponderSync™ software. You can synchronize your daily assignments with the information systems essential to delivering quality care, and improve everything you do — every day.
